

ANANDU SREEKUMAR

Brussels, Belgium • ananduskumar96@gmail.com • +32-477049912 • LinkedIn: [Anandu Sreekumar](#) • Website: [Anandu Sreekumar](#)

AI/ML Engineer with 6+ years of industry experience in software engineering and ML systems. Currently pursuing an MS in applied AI at VUB, focused on explainable reinforcement learning research.

Education

Vrije Universiteit Brussel

Master of Science in Computer Science - Artificial Intelligence

Brussels

Sep 2024 – Aug 2026

College of Engineering Perumon

Bachelor of Technology in Computer Science and Engineering

India

Aug 2014 – Jul 2018

Skills

Programming Languages:

Python, C#, C++, JavaScript, TypeScript

Frameworks / Libraries / Tools:

PyTorch, NumPy, Pandas, Google Agent Development Kit, Angular, .NET Core, D3.js, Plotly, OpenCV, Pillow, FastAPI

AI / LLM Frameworks & Architectures:

LangChain, RAG, Hugging Face, Stable Diffusion, YOLO

Databases:

MS SQL, MySQL Workbench, Cosmos DB, Big Query

DevOps / Cloud / Methodologies:

Azure DevOps, MLOps, ETL (Azure Data Factory), CI/CD, Agile, MCP, A2A, GIT

Work Experience

Euromonitor International

Senior Software Engineer / ML Engineer

Bangalore, India

Jul 2022 – Aug 2024

- Developed and presented a market-prediction prototype using a regression algorithm; the solution was later integrated into one of the organisation's flagship products.
- Designed and presented a functional chatbot prototype using LangChain and RAG, using an agentic architecture to significantly improve user experience.
- Designed and deployed Azure Data Factory pipelines automating data workflows for 1M+ records, reducing processing time by 80%.
- Designed and built a project framework incorporating microservices architecture, state management using Angular and .NET Core.

H&R Block

Software Engineer

Kerala, India

Jan 2020 – Jul 2022

- Developed and maintained multiple client-facing applications for US citizens to file taxes and communicate with tax professionals.
- Developed multiple Micro UI and microservices frameworks from scratch using Angular elements and C#, thereby improving user experience tenfold.

Speridian Technologies

Associate Developer

Kerala, India

Sep 2018 – Jan 2020

- Independently designed and developed a web application prototype for predicting market trends using a simple machine learning algorithm, which was delivered to the client and later evolved into a full-scale project.

Projects

Synthesizing Programs from a Deep Reinforcement Learning Agent (Master's Thesis) – *Python, Gym*
Developing an explainable reinforcement learning framework to generate interpretable DSL programs from DRL policies for controlling complex dynamic systems, aiming to balance performance and transparency in continuous environments.

Minimal poster generation using computational creativity with LLM-based internal evaluation – *Python, spaCy, VADER, LLM, Stable Diffusion, Hugging Face, FastAPI*
Currently working on a project to generate a minimal poster with a title and description as input. The system extracts the necessary details from the description to generate a poster. The internal evaluation uses an LLM guided by a reward function to improve the quality of the poster, inspired by reinforcement learning. This project is an experiment to analyse the potential of using large language models (LLMs) with reinforcement learning concepts in automating difficult tasks with less human intervention.
<https://github.com/ANANDU-S-KUMAR/Poster-Generator>

Predict Active Power for Wind Turbines – *Python, PyTorch, XGBoost, Random Forest, Neural Network*
Developed and compared multiple regression models, including XGBoost, Random Forest, ensemble methods, and neural networks to predict the active power output of wind turbines, selecting the model with the highest accuracy for final deployment.
<https://github.com/ANANDU-S-KUMAR/Regression-Models>

Euromonitor Passport (Senior Software Engineer / ML Engineer) *Angular, C#, Python, Azure, ML*
Developed and maintained Euromonitor Passport, a flagship market research platform providing industry data, macroeconomic trends, and consumer insights across 200+ countries, widely used by businesses, researchers, and analysts to understand industries, companies, economies, and global consumer trends.

Awards & Certifications

AI Agents Intensive Course with Google

Microsoft Certified: Azure AI Fundamentals

HackerRank Angular Certifications (Basic & Intermediate)

Block Star

Won a quarterly award known as 'Block Star'. This award is given to H&R Block's best-performing individuals from different projects.

Spot Award

Won 'Spot Award' for developing a feature in the application which increased the overall business, and for developing an in-house Treasure Hunt online game.

All India Hackathon

Represented Kerala state in the All India Hackathon 2018 for the Ministry of Agriculture and Farmers Welfare.

Languages

English, Dutch
